

AVL

AVL CONCERTO 5™

Experience the harmony

THE CHALLENGE

Development of better fuel efficiency, new powertrains, e-mobility and enhanced driver support systems, raise the challenge of handling and processing new types of data and the growing number of measurement quantities.

These trends increase the effort in analysis, visualization and reporting with the need for standardization and automation of repetitive tasks.

THE AVL SOLUTION

AVL CONCERTO 5™ is the generic data processing platform for visualizing, analyzing and reporting many measured and simulated data types. Its powerful extension options enable the individualization of tool functionalities to turn data collected throughout the vehicle development process into decision-relevant information.

AVL CONCERTO 5™ allows the direct comparison of simulation and measurement data supported by automated harmonization of quantity names and units. Interactive layout editing allows users to generate sophisticated reports and share them with colleagues and management. All calculation and layout elements can be distributed via shared libraries for standardized evaluation and result generation. With its open interfaces and integrated calculation functions AVL CONCERTO 5™ is the central data correlation tool for a wide range of automation, simulation and measurement systems.

THE ADDED VALUE

- One platform for harmonization and standardization
- Powerful data search, intuitive calculations and fully automated evaluations
- Interactive editing and reporting
- Integration of third-party algorithms

AVL CONCERTO 5™

Experience the harmony
