

## AVL - Reimagining Motion

<b>About AVL</b>	<p>AVL List GmbH (“AVL”), headquartered in Graz, Austria, is one of the world’s leading mobility technology companies for engineering, simulation, and testing in the automotive industry, and in other sectors such as aviation, marine, and energy. Its customers include leading automotive manufacturers, suppliers, and companies from the energy, transport, and industrial sectors.</p> <p>Based on extensive in-house research, AVL develops innovative technologies and development tools for green, safe, and sustainable mobility. The company supports international partners and customers in their sustainable and digital transformation - with a clear focus on electrification, software, artificial intelligence, and automation.</p> <p>With a holistic approach - from early concept phases to series production - the company develops vehicle architectures and platform solutions and drives innovation in new propulsion systems and energy carriers. AVL offers efficient solutions for all types of propulsion systems – from conventional and hybrid technologies to battery-electric and fuel-cell systems.</p> <p>As a global technology provider, AVL’s portfolio includes engineering, simulation, virtualization, and test automation for product development, as well as solutions related to software-defined vehicles, vehicle software, and the use of artificial intelligence. The company combines highly scalable IT, software, and technology solutions with extensive application expertise and offers powerful tools in areas such as big data, cybersecurity, and embedded systems.</p> <p>In addition, AVL supports companies in energy-intensive sectors on their path to more sustainable and efficient energy generation and supply.</p> <p>With 12,000 employees, more than 90 locations, and over 50 tech and engineering centers worldwide, AVL is shaping the future of mobility. In 2025, the company generated revenue of 1.83 billion euros, 11 % of which was invested in R&amp;D activities.</p>

## About AVL – SHORT DESCRIPTION

<b>Company Slogan</b>	Reimagining Motion
<b>Company Description (short, ~50 words)</b>	AVL is one of the world’s leading mobility technology companies for engineering, simulation, and testing. With a clear focus on electrification, software, artificial intelligence, and automation, the company supports its customers in the sustainable and digital mobility transformation. More than 12,000 employees work at over 90 locations worldwide.
<b>Company Description (medium, ~100 words)</b>	AVL List GmbH (“AVL”), headquartered in Graz, is one of the world’s leading mobility technology companies for engineering, simulation, and testing. AVL develops innovative technologies and development tools for sustainable, safe, and digitally connected mobility. The company focuses on electrification, software, artificial intelligence, and automation. With a holistic approach – from the concept phase to series production – AVL develops solutions for all types of propulsion systems as well as for software-defined vehicles and vehicle software. In addition, AVL supports companies in energy-intensive sectors on their path toward more sustainable energy generation and supply. With around 12,000 employees, more than 90 locations, and over 50 tech and engineering centers worldwide, AVL is driving the mobility transformation.
